DOUBLE-ACTING PRESSURE COMPENSATED AISI 316 STAINLESS STEEL VALVES

The pressure compensated valves are made up of an adjustable orifice and of a pressure compensator piston. The accuracy of the component processing ensures a very low hysteresis. The accurate checks carried out on the products ensure a good working of the valves also in bad working conditions. This special version, made in AISI 316, is indicated for aggressive fields, for example chemical, pharmaceutical, food sectors, sea field, where corrosion resistance is required, resulting both from the environment than other chemical agents. The only fluid allowed is hydraulic oil.

On request

- Fixing panel ring nut
- Stainless steel knob (mx)

materials

Body	AISI 316 stainless steel
Needle	38 Ni Cr Mo 4 UNI - EN 10083
OR	Viton
Antiextrusion ring	PTFE
Handwheel	GD - Al Si 12 UNI 5706
Handwheel (mp)	Acc. Inox AISI 316

example for ordering
